

THE CRATER RIM

DR KOHLS LATE HARVEST RIESLING 2012

VINEYARD

The fruit for this wine was selected from a small single vineyard on the Waipara Valley floor with soils consisting of Glasnevin gravels and limestone dust.

SOIL TYPE

Glasnevin gravels

WINEMAKING

The fruit was harvested late and hand sorted in the winery. Pressed off slowly over 6 hours the juice was then allowed to spontaneously start fermentation. It was then fermented slowly in cool conditions in small stainless steel tanks.

TASTING NOTES

A flagship label made only in superior vintages. Quite sweet with stone fruit, honey, mineral and clover flavours. Delicately luscious and concentrated wine with a lengthy finish. Soft acidity promotes accessibility but may compromise longevity.
